PROJECTS

CEEDSEED | AI-Powered Code Generation & Learning Platform (React.js , Node.js, Tailwind CSS, Vite, Nodemailer, Gemini API)

- Developed CodeSeed, an AI-powered SaaS coding assistant using MERN stack and REST APIs, featuring real-time code generation, Monaco Editor integration, session management, and modular client-server architecture to improve developer productivity and system scalability.
- Designed and deployed a secure, production-ready platform with Google OAuth, JWT authentication, email verification, and rate limiting, demonstrating strong expertise in multi-tier application architecture, API integration, system reliability, and technical problem solving.

Maketechberry | MERN Stack Platform

- Designed and supported a multi-tier MERN-based application enabling internship and project lifecycle management, implementing secure JWT authentication, RESTful APIs, MongoDB schema modeling, and automated data archival using TTL indexes to ensure scalable and reliable system performance.
- Built and maintained an admin operations dashboard with approval workflows, secure file handling (Multer), structured API communication (Axios), and role-based access control, demonstrating strong analytical troubleshooting, backend debugging, and end-to-end system support capabilities.

SmartEAI | AI-Powered Internship & Job Application Assistant | (React.js , Node.js, Tailwind CSS, Vite, MongoDB Gemini API)

- Built and maintained multi-tier MERN applications with REST APIs and database integration, troubleshooting backend logic, authentication, and deployment issues to ensure high system reliability and performance.
- Collaborated with cross-functional teams to analyze technical requirements, document solutions, and deliver AI-powered features, strengthening problem-solving, customer-focused thinking, and structured issue resolution.
